

TO: Personnel authorized to utilize student data files
FROM: Data Recognition Corporation
DATE: August 30, 2018
SUBJECT: 2018 Spring Keystone Exams Results

The 2018 Spring Keystone Exams District Student Data File provides a means to analyze academic performance data. These analyses can be used for academic planning purposes, improving curriculum, and providing further educational help to students.

To see a student's best score to date, please refer to columns BP, BQ, and BR.

All student-level data is in a CSV format and will open with your default spreadsheet application, most commonly Microsoft Excel. DRC recommends that these files be saved locally in a secure location and maintained as "read only" files.

It is the responsibility of the LEA and personnel from tested sites accessing the data to maintain strict confidentiality of test data. Please control access to these files by only granting permissions to those individuals who should have access to confidential student information. It is recommended that all individuals who are given access sign a confidentiality agreement before they use this data.

A data file "map" of field locations and descriptions is outlined on the following pages of this memo. If you have any questions, please contact Data Recognition Corporation's PA Customer Service Representatives at 1-800-451-7849 or email pacustomerservice@datarecognitioncorp.com.

Thank you.
