

CMAS: Science and Social Studies

SUMMARY DATA FILE LAYOUT Spring 2015

Listed below is the file layout for the Spring 2015 CMAS: Science and Social Studies Summary Data File. The district and school files are in .csv format. The first row contains the headers; subsequent rows contain the data.

The Summary Data File (page 6) provides aggregate student performance data for the district or school. The data is aggregated at the whole district or school level as well as a number of demographic group disaggregations, each level of aggregation is reported on a separate row. The list of reported groups is in the Disaggregated Groups and Descriptions table (page 2).

- Only students with scores are included in the aggregated score field calculations.
- Students without scores are not included in the denominator for average scores or the percent of students in a performance level.

The district files include the aggregate data for the state (groups with less than 16 students are masked) and their schools in addition to the district level data.

In the Summary Data file, columns A (Level) to AH (Total Number State Use 2), contain the same data as the Performance Summary Report. The rest of the file has the aggregate data reported on the Student Performance Report, Content Standards Roster, and Item Analysis Summary. This second section of the file is not disaggregated by demographic group. Only the standards appropriate for a particular content area contain information. Standard 4 PGC and GLE fields will be blank for Science.

To import the file into Excel:

1. Open Excel.
2. Click on Data Tab.
3. In the "Get External Data" group, click on "From Text"
4. Find your file from its download location.
5. Double click on the file, or select and click Import.
6. The Text Import Wizard will open. Follow the instructions provided by the Text Import Wizard. To retain leading zeros on fields (e.g. grade), set all fields to import data as text.
