- Common Education Data Standards Language Codes
- Primary Disability Codes
- Condition Codes
- Attemptedness/Completion Codes
- Include Indicators for Aggregate Reporting
- Claims for Smarter Balanced Summative Assessments
- Scale Score Ranges for Smarter Balanced Summative Assessments
- Scale Score Ranges for California Alternate Assessments
- Scale Score Ranges for California Science Test

The notes in this section provide important information concerning key elements of the file layout.

What's New in 2019–2020 for the LEA Downloadable File

Reporting Changes Due to COVID-19

Due to the suspension of testing in March 2020, this file contains all students who were enrolled in your LEA, in the California Longitudinal Pupil Achievement Data System (CALPADS), when the testing window was closed, and who were eligible for the Smarter Balanced Online Summative Assessments for English language arts/literacy (ELA) and mathematics, the California Alternate Assessments (CAAs) for ELA and mathematics, or the California Science Test.. It will not contain results for the California Alternate Assessment for Science, nor for the California Spanish Assessment. Results for students enrolled in your LEA who were eligible and registered for the California Alternate Assessment for Science or the California Spanish Assessment will be available in a different layout from in the Test Operations Management System (TOMS). The CAA for Science and CSA Preliminary Indicator data layout is available at <http://www.caaspp.org/administration/reporting/index.html>.

Reference Tables

- There is a new table that contains the [Common Education Data Standards Language codes](#).

Student Demographics

The student demographic data used in all aggregated reporting, including the data shown on the CAASPP Results website, is derived from CALPADS and reflect student demographics as captured in the demographic snapshot in the Test Operations Management System (TOMS), which is taken on the last day of the LEA selected testing window. Note that the source for each field is indicated in the file layout.

Data sources for the student data file are as follows:

- CALPADS—Extracted from CALPADS
- Derived—Created during generation of the student data file
- Scoring—Created as a result of scoring
- Test delivery system (TDS)—Extracted during processing of submitted online and paper-pencil assessments
- TOMS—Extracted from TOMS

Score Data

Score data includes the overall scale scores and achievement/performance levels for operational assessments. Also included are the claim performance levels for the Smarter Balanced assessments. The standard errors of measurement (SEMs) of the Smarter Balanced scale scores are provided as well as the lower and upper bounds of the error band representing +/- one SEM.

Test Administration Data

Test administration data includes flags and condition codes describing specific elements of test administration. These include flags for attemptedness/completion status, special testing conditions (cheating, parent/guardian opt out, etc.), and indicators of the embedded or non-embedded resources to which students were given access during the assessments.

Derivation of the Accommodations and Designated Support Indicators

The accommodations available indicator ([Field 132](#)) is derived by Educational Testing Service (ETS) and set to a “Yes” value if any accommodations were available in the student’s test record. The field description and the acceptable values columns in the layout provide specifics on the accommodations.

For example, where Embedded Accommodation 1– Text-to-Speech Passages (Online) ([Field 135](#)) has the value “TDS_TTS_Stim,” then the accommodation available indicator (Field 118) is set to “Yes.”

The designated support indicator (Field 133) is also derived by ETS and set to a “Yes” value if any designated supports were available in the student’s test record. The field description and the acceptable values columns in the layout provide specifics on the designated supports.

For example, where Embedded Designated Support 1–Permissive Mode (Online) ([Field 180](#)) has the value “TDS_PM1,” then the designated support available indicator ([Field 133](#)) is set to “Yes.”

Fields of Note

The following fields are of particular importance:

Field #	Section	Additional Explanation
1	Record Type	<p>Each record in the file will have a Record Type in Field 1 that identifies the test title. There are seven possible record types:</p> <ol style="list-style-type: none"> 1. Smarter Balanced Summative for English Language Arts/Literacy (ELA) (01) 2. Smarter Balanced Summative for Mathematics (02) 3. CAA for ELA (03) 4. CAA for Mathematics (04) 5. CAA for Science (05) – not available in this layout in 2019–2020 6. CAST (06) 7. CSA (09) – not available in this layout in 2019–2020 <p>An individual student could have up to four records. For example, a student in grade five has three records: for Smarter Balanced for ELA, Smarter Balanced for Mathematics, CAST (grade five), and CSA.</p> <p>The Smarter Balanced records include data for the non-performance task (non-PT) and performance task (PT) sections of the test.</p>
43, 45, 47, 50	Opportunity 1–4 Testing Status	These fields indicate if the test was completed, expired, or invalidated.
51–79	Test Details—Testing Location	<ol style="list-style-type: none"> 1. LEA and school information are provided multiple times in the data file because students may be associated with more than one school if they started one of the Smarter Balanced Summative Assessments (in the content areas of ELA or mathematics; or the PT or non-PT sections) at one school and finished at another.. 2. County/District and School codes are populated with the school where the student was enrolled and tested if the student took the test. Otherwise, these codes reflect the school where the student is registered. 3. Blank County/District and School code fields indicate that the student did not complete a test part. 4. A separate school also can be associated with the PPTs.

Fields of Note (*continuation one*)

Field #	Section	Additional Explanation
80–95	Test Details—Testing Date and Window	<p>Test date fields are either</p> <ul style="list-style-type: none"> • blank, if the student did not test; • populated with test dates, if the student submitted an online test; or • populated with the expired date, using Smarter Balanced test expiration rules or if a test was manually expired after the LEA’s selected testing window end date. <p>Test window fields are either</p> <ul style="list-style-type: none"> • populated based on the latest test registration, if the student did not test; or • populated with test dates, if the student submitted an online test; or • populated with the expired date, using test expiration rules or if a test was manually expired after the LEA’s selected testing window end date.
100	Testing Special Conditions—Condition Codes	A special condition code indicates the presence of a particular circumstance during testing. Refer to the Condition Codes reference table that starts on page 123 for a list of codes included in this field. Only one condition code can be applied per record type.
101	Attemptedness	This flag designates students as either non-completion, partial-completion, or completion. Refer to the Attemptedness/Completion Status Codes (Field 101) reference table for definitions of the statuses.
103	Unlisted Resources Construct Change	This field indicates if the student had available an approved unlisted resource that changed the construct of the test.
105	Include Indicator	Include Indicators, when set, indicate how a result for an assessment will be treated for reporting number tested and aggregate data including performance/achievement level proportions and scale score averages, and codify why a student’s score may not be reported. Include Indicators also show whether or not a student has taken required tests. Refer to the Include Indicators for Aggregate Reporting (Field 105) reference table for more information.

Fields of Note (*continuation two*)

Field #	Section	Additional Explanation
121–122	Smarter Balanced Scale Scores Error Bands	A random variation in individual scores that is quantified through the use of a statistic of measurement precision is called the conditional standard errors of measurement (CSEM). CSEMs are shown in bands or ranges. The maximum and minimum scale scores for +/- one CSEM are also provided. Note that the CSEM included with student test data is presented as a two-digit number followed by two blank spaces. This number has been rounded up from a decimal to a whole number.
287–332	Historical Score Data	Historical score fields include Grade Assessed, Smarter Standard Error of Measurement, Scale Scores, and Condition Code. Historical score fields are available for Smarter Balanced for ELA and mathematics, and the CAAs for ELA and mathematics.
333	UIN (Unique Identification Number)	Because a student who takes Smarter Balanced Summative Assessments might also take a science test, the UIN, which is unique for every record in the file, may be used to join the records together so that all student information can be matched.

SB for ELA and mathematics	N	Non-completion	<p>A student had not logged on to both parts or logged on to a single part of the test (non-PT or PT), but not both. This is the default attemptedness when test registration is created. N is applied by the system for all force complete students. Force complete records are identified when the reportable extract received from the scoring application contains Exit Condition = Force Complete.</p>
SB for ELA and mathematics	P	Partial-completion	<p>A student logged on to both parts (non-PT and PT) of the test but did not respond to any items on one or both parts. P can coexist with a LOSS condition code. P is applied by the system when the following conditions are met:</p> <ul style="list-style-type: none"> For examinees who are not PT field-test examinees, (PT_ItemCountScored < 1 or Non-PT_ItemCountScored < 1) and ExitCondition <> (not equal) ForceComplete For PT field test examinees, (Non-PT_ItemCountScored = 0 [the user logged on] and PT_ItemCountScored = 0 [the user logged on]) and ExitCondition <> (not equal) ForceComplete

Attemptedness/Completion Status Codes (*continuation two*)

Test	Attemptedness/ Completion Status	Label	Description
CAAs for ELA and mathematics	Y	Completion	A student who had a test logon and number of answers (scored items) is greater than or equal to 4. Y is applied by the system when the following is met: <ul style="list-style-type: none"> • ItemCountScored >= 4
CAST	N	Non-completion	A student who had not logged on to the test. This is the default attemptedness when test registration is created.
CAST	P	Partial-completion	A student who logged on to the test but did not respond to any items.
CAST	Y	Completion	A student who logged on to the test and responded to at least one item.

Include Indicators for Aggregate Reporting (Field 105)

Test	Code	Meaning of Include Indicator
SB for ELA and mathematics	N	The student either <ul style="list-style-type: none"> • did not test; • only completed one portion [Non-PT] or [PT] of the content-area assessment; • had a parent/guardian exemption; or • had a significant medical emergency and was out for the testing window.
SB for ELA and mathematics	E	An EL student was exempt for the ELA assessment due to being enrolled in a U.S. school for less than 12 months.
SB for ELA and mathematics	T	The student was tested and either did not meet the scoring threshold or the completion/attemptedness is a value of “P.” However, a “T” Include Indicator also includes the LOSS condition code, which could have either a “P” or “Y” value in the completion/attemptedness field.
SB for ELA and mathematics	R	The student was either tested with an unlisted resource where the test construct was changed, or the test was invalidated.
SB for ELA and mathematics	Y	The student was enrolled during an active testing window, completed the test, and has met completion/attemptedness criteria.
CAAs for ELA and mathematics	N	Student either <ul style="list-style-type: none"> • did not test; • had a parent/guardian exemption; or • had a significant medical emergency (out for testing window).

CAAs for ELA and mathematics	R	Student was tested with an unlisted resource where the test construct was changed or the test was invalidated.
CAAs for ELA and mathematics	Y	Student was enrolled during the active testing window, completed the test, and has met completion/attemptedness or has an INC0 or INC1 condition code.
