Condition Codes (Field 53)

Code	Description	Derived From	Resulting Score	Comment
ALT	Student was tested with an alternate assessment	One, two, three, or four of the alternate assessment domains are selected in the LST for the student; or an alternate assessment and domain exemption on one or both composites are selected in LST for the student.	LOSS score on ALT designated domain(s)	A system-derived condition code, based on scoring output, which can be scores or values received from LST.
EXD	Exempt Domain	Only one of the two domains within a composite can be selected as exempt in a student's LST.	An interpolated score for the composite using the nonexempt domain for that composite; derived overall score.	A system-derived condition code, based on scoring output, which can be scores or values received from LST.
NT	Not Tested	Default condition code when eligibility is valid, there is no score or condition code, and the student was not reclassified.	Student is present in data file with no score or generated Student Score Report.	The NT condition code is applied as a closing event, at the end of the statewide testing window and when all student scores have been imported into TOMS.

NOTES:

- Condition codes are used by LEAs and the scoring team to identify a special condition in a student's test record. Condition codes impact treatment in reporting, such as driving the inclusion of special text on the Student Score Report or setting Include Indicators.

- Condition codes signal the need for special handling or routing of a student record in the reporting process. Condition codes are either derived by TOMS or set by LEAs marking a special condition on the answer book for a paper-pencil test.

- All condition codes are visible in the TOMS user interface.

- Only one condition code can be applied per student.

- Condition codes impact Include Indicators and aggregation logic.

- Condition codes are used in reporting deliverables as follows:
  - Condition codes drive Student Score Report text.
  - Condition codes appear in the production and LEA student data (downloadable) files.

Include Indicators (Field 54)

Include indicator	Description
N	Student did not test.
Y	Student enrolled during the active testing window, completed the test, received a valid score, and partially or completely met the completion or attemptedness criteria. This can include the ALT or EXD condition codes.
